No report at this time.

Water Quality:  
Scott Ames reported that the first sample would be taken next week.

Weed Abatement:  
Paul Jacobson met with Dr. Pinou of Western CT State University on April 9<sup>th</sup> to discuss grass carp. Over 4,000 carp were released in Candlewood and so far, they have stayed in the lake. The possibility of studying a small sampling of 4 or 5 carp with tracking beacons in in our lake was discussed. The intent was to see if any went over the dam or through the power plant. It will be an uphill battle as DEEP deems the carp to be an invasive species and is hesitant to approve their use.  
This year's weed abatement is tentatively scheduled for July 11<sup>th</sup>. The amended permit is still in the approval process but the existing permit is still in effect.

Vessels and Equipment:  
The patrol boats have been uncovered and need the oil changed and they will be ready for the water. The radios will need reprogramming which will be done by the State police at no charge. Docks will go in this weekend.
